Profile

Experienced full stack developer with 4+ years of experience in modern web application development. Passionate about building scalable backend systems and elegant frontends using Laravel, React, and Vue. Adept at agile environments and collaborative team projects.

Professional Experience

Senior Web Developer

Nexttech Solutions — 2023 to Present

- Lead the development of scalable SaaS platforms using Laravel and React.
- Integrated secure third-party APIs and payment gateways.
- Built and maintained large-scale, high-performance B2B eCommerce systems.

Junior Web Developer

Assistant to Freelance Developer — 2022 to 2023

- Assisted in building and maintaining custom eCommerce solutions using PHP and Laravel.
- Worked on WordPress-based websites, creating and editing layouts using Elementor.
- Handled bug fixes, minor feature implementations, and client support tasks.

Education

Intermediate in Computer Science

Wings College, Dultala 2020 – 2022

Projects

Laravel NYTimes API Package – [Packagist.org](https://packagist.org/packages/ehisham/nytimes-api)

A Laravel package for integrating the **New York Times API** seamlessly into applications. Developers can quickly fetch news articles, sections, and other data with minimal setup. Key features include:

- Simple configuration with a publishable **nytimes.php** config file
- Convenient **Facade** and helper functions for easy usage in controllers and Blade
- Supports multiple endpoints like **section lists** and **top news**

Trophy Winner Management System – aqhatrophies.com

A Laravel-based system for managing trophy orders for horse race winners. Users can claim their first trophy for free, and pay for additional copies. Key features include:

- Integrated **USPS** and **EasyPost** for real-time shipping and tracking
- Implemented secure payment processing with **Stripe Checkout**
- Custom admin panel for order and inventory management

E-Commerce Platform – dewoolfsonlinens.com

A large-scale, legacy eCommerce platform built in custom PHP. Contributed to major feature enhancements and infrastructure improvements:

- Revamped session handling and implemented modern password encryption
- Developed a dynamic coupon and discount system
- Designed modern HTML email templates and improved order notification flows

Real Estate Listing Platform – blowingrockrealestatenc.com – Laravel Version

A fully custom Laravel-based platform for managing and displaying real estate listings. Connected to MLS APIs for property synchronization, with admin controls for custom listing features.

Real Estate Listing Platform – blowingrockproperties.com – WordPress Version

WordPress-based real estate website. Developed a custom plugin that pulls property listings from the MLS API and displays them in a dynamic frontend interface. Also implemented SEO and performance optimizations.
